
The solution CUSTOMER MONITOR[®] offers a wide range of monitoring and diagnostic tools to watch over the IT environment and devices.

First, we recommend you to get familiar with the [philosophy of setting the Online monitoring \(Watches\)](#) [1] and then read more about the individual functions for monitoring and diagnostics from the left menu below.

Note : The nearest innovation of settings and displaying of Watches on the CM portal will also bring templates for typical monitoring scenarios.

Date:

12/10/2011
