**Remote change of C-Monitor client settings**

[Option to get the C icon among displayed icons in the taskbar](#)

**Remote change of C-Monitor client settings**

Initial setup of every newly registered C-Monitor client are taken from settings of the customer, under which the device is registered. C-Monitor client settings in the customer's settings may be changed in the tab technical settings, as displayed on the following image.

Page 2 of 5

Image: Zobrazenie počiatočných nastavení C-Monitor klienta po registrácii, ktoré sa nachádzajú v nastavení zákazníka v záložke Technické nastavenia

In the first section of *Technical settings*, you may set a customer name - this name is later used for searching on CM Portal.

There's also given the date of license validity of this customer, with an option of automatic prolongation of the license - if C-Monitor client doesn't have a valid license, no parameters are evaluated on this PC until the license is restored.

By enabling the option *enter password for access to C-Monitor configuration*, it will be possible to change C-Monitor client settings, edit and add periodic tasks and watches only after entering a password, which you define here. We recommend to always have a password defined, as it prevents unauthorized changes in settings from the PC user.

Other settings are described on the image and they mostly serve to communication of the C-Monitor client with CM server. These settings are created automatically at creation of customer.

### Warning

After a change of technical settings of a customer, these changes are only reflected to other newly registered C-Monitor clients. Settings of previously registered C-Monitor clients may be changed at two places - either in the section *Admin zone* -> *C-Monitor client* -> *C-Monitor settings on PC* -> here you may even select several PCs and edit them at once by pressing the button *edit selected*. The change of the settings is displayed on the following image, fields with gray background have the same settings as those of the whole customer.

Image: Zmena nastavení C-Monitor klienta v časti Admin zóna -> C-Monitor klient -> Nastavenia C-Monitor na PC

The other option how to edit C-Monitor client settings is in the section *Admin zone* -> *Main menu* -> *Computers* -> here select a concrete PC and press the option *edit*, then move to the tab *C-Monitor settings* and here you can change C-Monitor client settings for one device at a time, they cannot be edited collectively.

### Option to get the C icon among displayed icons in the taskbar

Since version 2.6, the C icon will appear in the taskbar after installation of C-Monitor to WIN7/2008. For older versions, this option has to be enabled in the settings. This option may be changed in the section *Admin zone -> C-Monitor client -> C-Monitor settings on PC*, as displayed on the following image.
