

***"Customer Monitor automatically registers your computers, each software, detailed HW configuration and serial numbers.
Don't lose your control and get rid of possible risks"***

Customer Monitor has a software audit integrated. You can see how many licenses you are using, which of them are about to expire and number of new licenses needed. Hardware detection of computers runs automatically and is very precise. Simple and semi-automatic creation of network topology. Monitoring of changes, backup of configurations and settings.
